MERN Stack Developer with a strong foundation in web development and a passion for building real-world applications. Skilled in creating responsive and user-friendly web applications using MongoDB, Express.js. React.js and Node.js. Eager to contribute to a dynamic team and grow as a professional developer in the IT industry.

PROFESSIONAL EXPERIENCE

Swiggy & Blinkit (Telecalling) 2025 – 26
Rider ID Creation Executive

- Created and verified rider IDs for Swiggy and Blinkit by collecting and validating required documents.
- Handled data entry, maintained records and ensured accurate information in the system.
- Provided onboarding support to new riders and assisted with queries related to registration and KYC.
- Worked in a fast-paced environment, maintained daily targets and ensured high accuracy in data processing.

PROJECTS

FOODIE – Food Ordering Web Application (In Progress)

- Developing a full-stack food ordering platform with user and restaurant modules.
- Implemented features like restaurant listing, menu management, cart and order placement.
- Using MongoDB for data storage, Express.js for backend APIs, React.js for frontend and Node.js for server.
- Planning to add payment integration, order tracking and real-time notifications.

RSTORE – E-commerce Web Application

- Built a modern e-commerce platform for electronics products using the MERN stack.
- Implemented product listing, cart, and order management features.
- Integrated localStorage for cart and order data, and designed a clean, responsive UI with Tailwind CSS.
- Used MongoDB Atlas for database and deployed the application for real-world usage.
